NOTICE INVITING TENDER (NIT)

NOTICE INVITING TENDER

INTRODUCTION

- 1.0 NHPC Limited (hereinafter called NHPC) intends to procure Hybrid Power for Supply of 1200MW power from ISTS connected Wind-Solar Hybrid Power Projects and additional capacity under “Greenshoe Option” upto 1200MW with or without Energy Storage Systems (ESS) on ‘anywhere in India’ basis under Tariff Based Competitive Bidding (TBCB) (conducted online followed by reverse auction). After conclusion of bidding process NHPC shall enter into Power Purchase Agreement (PPA) with the selected Bidders, based on this RfS for purchase of Solar-Wind Hybrid power for a period of 25 years from the Scheduled Commissioning Date of the project based on the terms, conditions and provisions of the RfS and PPA.
- 1.1 This document is for selection of Hybrid Power Developers/Hybrid Power Generator (HPD/HPG) for setting up-ISTS connected Solar -Wind Hybrid Power Project of aggregate capacity of **1200 MW** and additional capacity under “Greenshoe Option” upto 1200MW on the land to be identified & arranged by the HPD in anywhere in India. The Hybrid power produced by the selected HPD from their respective Solar-Wind Hybrid Power Projects will be purchased by NHPC and would be sold to the State Utilities/ Discoms/any other Beneficiaries. The details of Buying Entities shall be intimated at a later date. NHPC shall at its discretion be entitled to substitute any entity in other states only for selling the power procured from the selected Bidders. NHPC shall be an intermediary nodal agency for procurement of power supplied by the HPD and sale of such power to the Buying Entity(ies) entirely on back-to-back basis, based on due performance by the HPD as well as the Buying Entity(ies).
- 1.2 The minimum project size will be 50 MW and in multiples of 10 MW thereafter under OPEN category. **The cumulative capacity offered should not exceed 600 MW without “Greenshoe Option” and 1200MW for a bidder with “Greenshoe Option. However, for Projects located in North-Eastern States and Special Category, the minimum quantum of Contracted Capacity that can be offered by a Bidder, including its Parent, Affiliate or Ultimate Parent or any Group Company, shall be 30 MW.**
- 1.3 The bidders will be short-listed by the process of e-bidding (**Single Stage Two Envelope Bidding Process. Envelope-I: Technical Bid and Envelope-II: Financial Bid**) to be followed by reverse auction process for selection of bidders. E-bidding is a new methodology for conducting Public Procurement in a transparent and secured manner. For conducting electronic tendering, NHPC Ltd. is using the Central Public Procurement (CPP) Portal <http://eprocure.gov.in/eprocure/app>. The site can also be viewed through e-procurement corner of NHPC website www.nhpcindia.com and CPP Portal.

OVERVIEW OF RFS:

- 1.4 Hybrid Power Developers (hereafter referred to as HPD selected by NHPC based on this RfS, shall set up of ISTS-connected Hybrid Projects for supply of 1200 MW and additional capacity under “Greenshoe Option” upto 1200MW Hybrid Power, from ISTS-connected Solar-Wind Hybrid Power Projects in India, on Build-Own-Operate (BOO) basis. NHPC shall enter into a Power Purchase Agreement (PPA) with the successful Bidders selected based on this RfS for purchase of power for a period of 25 years based on the terms, conditions and provisions of the RfS document and standard Power Purchase Agreement (PPA). The standard PPA document can be downloaded from CPP portal <http://eprocure.gov.in/eprocure/app>

- 1.5 NHPC shall enter into PPA with successful HPD for a period of 25 years from the date as per the provisions of PPA. The Bidders will be free to avail fiscal incentives like Accelerated Depreciation, Concessional Customs and Excise Duties, Tax Holidays etc. as available for such projects. The same will not have any bearing on comparison of bids for selection. As equal opportunity is being provided to all bidders at the time of tendering itself, it is up to the Bidders to avail various tax and other benefits. No claim shall arise on NHPC for any liability if Bidders are notable to avail fiscal incentives and this will not have any bearing on the applicable tariff.
- 1.6 Bidder shall quote a single tariff for entire of its projects' capacity offered, which shall be applicable for all the 25 years.
- 1.7 If the Project is transferred or sold to a third party during its tenure (after initial lock-in period of 1 (One) year after "Commercial Operation Date and Schedule Commencement of Supply Date" (SCSD)), NHPC will retain full rights to operationalize the PPA with the third party, which will be under full obligation to honour all the obligations and terms & conditions of the PPA.

SELECTION OF TECHNOLOGY & ELIGIBLE PROJECTS UNDER THIS RFS

- 1.8 Under this RfS, the HPD shall set up the Solar-Wind Hybrid Power Project(s), including the dedicated transmission network up to the Interconnection/Delivery Point, at its own cost and in accordance to the provisions of this RfS document. All approvals, permits and clearances required for setting up of the Project(s) and/or dedicated transmission network upto the Interconnection/ Delivery Point (along with connectivity), including those required from State Government and local bodies, shall be in the scope of the HPD. The Projects to be selected under this scheme provide for deployment of wind-solar PV and ESS (if any) capacities. However, the selection of Projects would be technology agnostic.

The Projects to be selected under this RfS for aggregate capacity of 1200 MW and additional capacity under "Greenshoe Option" upto 1200MW to be installed anywhere in India, provide for deployment of SOLAR-WIND HYBRID Power. However, the selection of projects would be technology agnostic within the technology mentioned above. Crystalline Silicon or Thin Film or CPV, with or without trackers can be installed for the solar component. Only commercially established and operational technologies can be used to minimize the technology risk and to achieve the timely commissioning of the Projects.
- 1.9 Developers/Generators who have already commissioned Solar-Wind Hybrid Power Plants or are in process of constructing such plants and have untied capacity may also participate in the bid. Developers who have already set up capacity or who have spare untied capacity (that is unencumbered from any power supply commitments or power purchase agreements and is available for augmenting the proposed Solar-Wind Hybrid Power under this RfS) may also participate in the bid.
- 1.9.1 No separate Central Financial Assistance is envisaged for implementation of the Projects selected under this RfS.

GUIDELINES FOR IMPLEMETATION OF THE RFS

- 1.10 Govt. of India has set an ambitious target of 500 GW installed electricity generation capacity from non-fossil fuel-based energy resources by 2030. With the intervention of Government of India, the risks associated with solar and wind power sector have been brought down by way of advanced arrangement of land and evacuation through solar parks, green energy corridors, a secure and standardized PPA for 25 years with elaborate mechanism for risk apportionment and compensations, payment security, etc.

Such de-risking of renewable energy sector, coupled with advancement of technologies and economies of scale have resulted in bringing down the tariffs in solar and wind power sector to levels lower than the cost of power from the conventional non-RE/thermal power plants, thereby aiding in rapid deployment of solar and wind capacity in the country.

However, the intermittency and variability associated with renewable energy and low-capacity utilization of the transmission system is a growing concern impacting effective RE integration / grid stability. It is a fact that wind is better during morning and evening or night, complementing solar energy which peaks during daytime. It has been established that combining different sources of renewable energy reduces their individual variability and gives better output. Hybrid projects backed by storage facility can further enhance the quality of RE power. Further, the grid connected wind-solar PV hybrid system also facilitates optimal and efficient utilization of transmission infrastructure and land, reducing the variability in renewable power generation and achieving better grid stability.

With the objective to enable procurement of Solar-Wind Hybrid Power by DISCOMs from grid-connected Hybrid power projects, through tariff based competitive bidding Ministry of Power has issued “Guidelines for Tariff Based Competitive Bidding Process for Procurement of Power from Grid Connected Solar-Wind Hybrid Projects” vide Gazette Resolution no. 27/03/2023-RCM dated 21.08.2023 and its subsequent amendments dated 17.11.2023 & 02.02.2024. These Guidelines have been issued under section 63 of the Electricity Act, 2003 to enable procurement of Solar-Wind Hybrid Power by DISCOMs from grid-connected Hybrid projects, through tariff based competitive bidding. This RfS document has been prepared in line with the above Guidelines, including subsequent amendments and clarifications, issued until the last date of bid submission of this RfS. These guidelines and their elaborations/ clarifications form the basis for selection of new Projects under this RfS. In case of any difference in interpretation between this RfS document and said guidelines, the matter shall be referred to the ‘Appropriate Authority’ as per issued guidelines and latest amendments thereof and the decision of this ‘Appropriate Authority’ shall be final and binding on Bidder/HPD and NHPC.

- 1.11 NHPC Limited (NHPC) has issued this RfS in the capacity of “Intermediary Procurer/Renewable Energy Implementing Agency (REIA)” by Ministry of New and Renewable Energy (MNRE), Govt of India as defined in the aforementioned Guidelines. NHPC may develop a suitable monitoring mechanism, to analyze the performance of the projects and carry out random checks to verify compliance of quality standards.
